

FOR IMMEDIATE RELEASE

Western Forms, Inc. Creates Partnership with B.E.P. Forming Systems, Inc.

Kansas City, Missouri - December 6, 2007: Western Forms, Inc. has created a new partnership with B.E.P. Forming Systems, Inc. previously headquartered in Fayetteville, Georgia. The newly formed entity, B.E.P. Forming Systems, L.L.C. will be headquartered in Kansas City, Missouri. Greg Peacock, Founder of B.E.P. Forming Systems will serve as Vice President/General Manager of the newly formed entity. Mr. Peacock and his firm, since 2001, have pioneered the use of aluminum in the application of “BIG PANEL” forming systems in the United States. Most applications for this fast growing segment are in the commercial, industrial and heavy construction sectors.

About Western Forms, Inc.

Western Forms, Inc., based in Kansas City, Missouri, is the provider of aluminum forming systems and related services to the concrete construction industry. Western Forms was founded in 1955 and invented the fabricated aluminum form in 1963. In the last 10 years, Western Forms has grown through the expansion of forming systems offerings for new applications. One fast growth area in the last several years has been servicing the growing need for systems for cast-in-place concrete home construction. Western is currently supplying systems to builders and developers in the United States and in 35 other countries. Western Forms, with its 350 employees, continues to lead the industry in innovations. www.westernforms.com
